

ABSTRACT OF THE DISCLOSURE

The present invention is directed to a method and apparatus in which a consumer, without technical skill or special tools can quickly and easily change or add a color to the computer case of their personal computer. Because of the large number of available color panels, it is necessary to provide an aftermarket kit in which the consumer can customize the computer case. Advantageously, this permits the consumer to have a computer in green, blue, red, violet, etc. Also, advantageously, the consumer merely needs to remove a plurality of hole plugs and then install the color panels using supplied attachment feet or mounting plugs.
